

# House Compromise Gives Dickey \$800,000

## Congress Gets Set For Adjournment

WASHINGTON (AP) — Handling the Johnson program a pair of setbacks on the way. Congress stepped up its adjournment drive Thursday, strengthening prospects the session will end Friday or Saturday.

The lawmakers — probably only temporary — of two administration requests for money came in conference committee action on a supplemental appropriations bill.

Swift approval by both chambers of the \$4.7-billion funding for many administrative projects cleared away one of the few remaining potential roadblocks on the path to adjournment.

The House passed the money measure on a roll call of 231 to 84 while the Senate approved the bill on a voice vote.

Senate conferees agreed to House elimination of a \$500,000 item from a catch-all appropriations bill to start payment of rent subsidies for low-income families. This means this administrative program can't be started before next year.

Later, Senate conferees went along with the House again and eliminated funds to start a so-

Governors Visit Far East

Gov. John H. Reed, chairman of the national governors conference is heading a group of 10 U.S. governors on a tour of Tokyo, Hong Kong and South Viet Nam. They enjoy the hospitality of Japan's Premier Sato in Tokyo Thursday. From left

to right are U.S. Ambassador Edwin Ruskhai; Gov. George Romney, Michigan; Premier Sato; Gov. Carl E. Sanders, Georgia; Gov. Clifford P. Hansen, Wyoming and Gov. Reed.

## PRA Delays Approval Of 3 Housing Sites

By WILLIAM H. WILLIAMSON  
Staff Reporter

The Portland Rental Authority Thursday night delayed approval of three sites of housing proposed by the Portland Housing Authority for about 100 units of public housing.

The sites are all within renewal areas — Bayside Park and Munjoy Shore. Specifically they are located on the site of the old county jail, at Cumberland Avenue and Boyd Street, and on Munjoy Hill — at Congress and Atlantic Streets.

THE PRA WANTS renewal authority approval of the sites so it can go ahead with things like obtaining the approval of the Federal Housing Administration. Most of the land is owned by the PRA and would have to be purchased by the housing authority.

A good deal of the land on Munjoy Hill, however, isn't owned by the PRA, and would have to be negotiated for privately.

PRA Chairman James H. Burke said Thursday night that he is concerned about two things and that he'd have to know more about them before he could offer approval of the sites.

The first is the size of the lots. He said he's not sure there's big enough for the number of units proposed by the PRA.

BURKE SAID PRA Director George O. Mulligan has told him he, too, is a "little skeptical" about the lot sizes.

## Reed Guest Of Sato At Tokyo Dinner

TOKYO (UPI) — Nine visiting U.S. state governors met Thursday with Japanese Prime Minister Eisaku Sato and Tokyo Metropolitan Governor Ryutaro Aizawa.

The governors, here for a 12-day goodwill visit and a conference with the Japanese prefecture (state) governors, were guests at a buffet luncheon given by Sato at the prime minister's official residence.

Their talks were described as informal.

Friday the governors will be received in audience by Emperor Hirohito at the moated Imperial Palace here.

The American delegation is led by Maine's Gov. John H. Reed. The other governors are Tim Babcock of Montana, Henry Helms of Oklahoma, John A. Burns of Hawaii, Clifford P. Hansen of Wyoming, Philip H. Hoff of Vermont, Harold E. Hughes of Iowa, George Romney of Michigan and Carl E. Sanders of Georgia.

Gov. John H. Chafee of Rhode Island is expected to join the group on Sunday.

In the conference with their Japanese counterparts Friday, the governors will discuss common problems such as how to promote tourism and how to cut down on public nuisances — transportation tie-ups, air and water pollution and the like.

Next week the delegation will tour Kyushu, Japan's southernmost island, and visit several major Japanese industrial complexes.

Thursday afternoon the governors got a taste of Japanese cooking and enjoyed a dish called "tempura" — fried shrimp and vegetables. A second dish, "sushi" — boiled rice cakes topped with slices of raw fish — got a less warm reaction although Gov. Hoff of Vermont said "I kind of liked it."

## Klan Charged With Plotting Violence And Harassment

WASHINGTON (AP) — Congressional investigators accused the Ku Klux Klan on Thursday of plotting violence and harassment — including suffling dead rats and headbashing into mailboxes of their enemies.

Finishing up two days of questioning of James H. Jones, Klan grand dragon of North Carolina, staff members of the House Committee on Un-American Activities brought out that a Klan officer in New Bern, N.C., pleaded guilty to a series of bombings.

Jones, as he has done all along, refused to answer any questions about the case involving Raymond Mills, who has since testified before the committee in closed session.

A letter from Jones was read in which he said Mills had been suspended but not "banished."

Chairman Edwin E. Willis, D-La., said, "You pretend to be against violence, but you have never expelled anyone."

This exchange followed the introduction of tax returns showing that Jones' income took a hefty jump when he became

## Informer Fingers Wilkins As Slayer Of Mrs. Liuzzo

HAYNEVILLE, Ala. (AP) — For the second time, an FBI informer pointed out young Klansman Collie Leroy Wilkins Jr., as the gunman who killed a white civil rights worker from Detroit.

Red-haired Gary Thomas Rowe, a former Birmingham bartender, told during 25 minutes of direct testimony how he and three other Klansmen followed a car in which Viola Liuzzo, 38, was shuttling marchers back from Montgomery to the Alabama capital March 25.

Alabama Atty. Gen. Richmond Flowers, who is directing the prosecution during the second trial of Wilkins on murder charges, said the state will present one additional witness Friday morning — an FBI ballistics expert. The trial recessed late in the afternoon.

Rowe was brought into the courtroom through a side entrance under heavy guard of FBI agents and state troopers.

"Eventually, we pulled up," Rowe, 33, said in describing the chase of the Liuzzo car which began in Selma.

"The first thing I knew, Wilkins stuck his arm out of the window, elbow length. Wilkins told Eugene Thomas to speed up just as he pulled up the woman driving looked at us."

Rowe, who said he infiltrated the Klan five years ago at the request of the FBI, told the court that Wilkins fired two quick shots then several more, and Thomas and William O. Eaton fired several shots.

"I don't think you kill these people," Rowe said he told Wilkins.

"He smacked my right leg," he said. "Baby brother, I don't miss. That bitch and that bastard are dead as hell."

The witness gave similar testimony at Rowe's first trial in May. That trial ended with a hung jury. Thomas and Eaton

North Carolina grand dragon he declined to answer questions about that, too, citing constitutional grounds.

Chief investigator Donald T. Appell read a long list of North Carolina cross-burnings, many of them on May 28 of this year, including one on the lawn of the governor's mansion.

Willis then read from what he indicated was a Klan document entitled, "Harassment."

It said, "All members should tax their minds to devise new means. They should have a humorous twist in the nature of Halcyon's prayers."

The booklet then gave 16 suggestions, including: roofing nails, sugar and molasses in gas tanks, firecrackers, snakes and lizards, slick bombs, tear gas, paint, BB guns, roman candles and skyrocketers and noisemakers.

Willis said it also mentioned throwing dead rats in front of homes or into mailboxes, chickens with their heads cut off, and dead bugs.

Rep. John M. Ashbrook, R-Ohio, quoted from a Goldsboro, N.C., newspaper account of a Klan rally there. It said Jones told the rally, "The only way to

kill a nigger is to kill him with his own hands."

Willis said it also mentioned throwing dead rats in front of homes or into mailboxes, chickens with their heads cut off, and dead bugs.

Rep. John M. Ashbrook, R-Ohio, quoted from a Goldsboro, N.C., newspaper account of a Klan rally there. It said Jones told the rally, "The only way to

## Prayer For Today

O God, may the resources of life never be obscured by its problems and burdens. May we recognize Thy nearness. Thy strength, and Thy love, and in such recognition rest in Thee. We bring our personalities and burdens and troubles to Thee, Grant us wisdom, grant us courage for the living of these days. As we commit our way to Thee, we trust that Thou wilt bring to pass in us, for us, and through us all that is best; for Jesus sake. Amen.

—M. Rex McKee, Redick, Jr., publisher of *Prayerbook*, Nashville, Tenn. Reprint Summary.

## Skimpy 3-Votes Ok's Funds To Plan Project

By MAY CRAIG  
WASHINGTON — An \$800,000 appropriation to plan the \$227 million Dickey-Lincoln School power project on Maine's St. John River won House approval Thursday by a skimpy three-vote margin.

The action came on a roll call vote that was demanded after a standing vote which favored the controversial hydroelectric proposal by 10 votes.

The roll call was 163-162.

The planning appropriation is included in a companion supplemental appropriations bill providing funds for various government agencies.

THE SENATE, at the behest of Sen. Margaret Chase Smith, earlier had allowed \$145,000 to plan the project.

The House did not include the funds in its version of the appropriations measure. But House conferees subsequently agreed at a meeting with Senate Appropriations Committee members to go along if the amount was cut to \$800,000.

Thursday's squeaker vote in the House was on acceptance of the Senate-House conference report.

The Senate has not yet acted on the report.

IN ANOTHER DEVELOPMENT, it was brought out that the public works authorization bill, which includes Dickey,

probably will be signed by the President in Texas.

The measure has been signed by Vice President Hubert H. Humphrey as president of the Senate and by House Speaker John W. McCormack. It probably will go to the President Friday, but too late for him to sign it here because he plans to leave here early Friday for his Texas ranch.

The President has 10 days after adjournment of Congress in which to sign the many bills on which congressional action is being completed.

Opponents of the Dickey project, which is battered and bloody from repeated assassination attempts, were still planning to bring the House floor for votes favorable to Dickey.

## Illinois Company To Build Orrington Chemical Plant

By FRANK SLEETER  
Boston Reporter

SKOKIE, Ill. — International Minerals & Chemical Corp. Thursday said it will build a \$10-million chemical plant in Orrington, Maine. It is scheduled to be completed in the first half of 1967.

This would be the big mineral chemical company's first plant of this type.

Nelson C. White, IMC president, said the plant will produce initially more than 75,000 tons of chlorine, caustic soda and related products for pulp paper and other industrial uses, primarily in the New England area.

The highly automated plant would employ about 60 persons initially. Preliminary engineering work is under way and construction is slated to start early next spring.

THE SITE is on an 80-acre tract just to the Penobscot River, about six miles south of Bangor.

The Orrington project has been in the study stages for about a year, an IMC spokesman said last March. The big company announced it had taken an option on the 80-acre site for a chlorine and caustic soda plant.

At the time that announcement was made, Allied Chemical Inc. was in the process of decision was clearing ground for a \$5 million-plus caustic soda and chlorine gas plant at Jay.

In April, Allied announced it had decided to hold up work on the Jay plant.

Wilbur H. Brumfield, president of the Allied division, said Thursday that his company still holds options on 25 acres of land in Jay, but still doesn't

have enough customers for its caustic soda and chlorine to build the plant there.

"I can't say that I'm optimistic about our prospects of building a plant in Brumfield said, 'but we still are trying to find the customers.'"
